```
import java.util.Scanner;
public class Pyramid
    public static void main(String[] args)
         Scanner \underline{s} = new Scanner(System.in);
         System.out.println("Enter number of rows :
");
         int n= s.nextInt();
         for(int i=1;i<=n;i++)</pre>
         {
             for(int j=0;j<n-i;j++)</pre>
                  System.out.print(" ");
              }
             for(int j=1 ; j<=2*i-1;j++)</pre>
                  System.out.print("*");
             System.out.println();
         }
    }
}
```
