```java
import java.util.Scanner;

public class Ext_digits {

    public static void main(String[] args) {
        int n ,m ,cnt = 0, a;

        Scanner s = new Scanner(System.in);

        System.out.println("Enter the Number");
        n= s.nextInt();
         m=n;

        while(m>0)
        {
            m=m/10;
            cnt++;
        }

        while(n>0)
        {
            a = n%10;
            System.out.println("Digit at position
"+cnt+" is : "+a);

            n=n/10;
            cnt--;
        }

    }

}
```
