```java
import java.util.*;
public class Palindrome {

    public static void main(String[] args)
    {
        String a, b="";

        Scanner s = new Scanner(System.in);

        System.out.println("Enter the string to
check if it is Palindrome or Not : ");
        a=s.next();

        int n= a.length();

        for(int i=n-1;i>=0;i--)
        {
            b+=a.charAt(i);
        }

        if(a.equalsIgnoreCase(b))
        {
            System.out.println("It is a
Palindrome");

        }
        else
            System.out.println("It is not a
Palindrome");

    }

}
```
